Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 February 2000.
- 2a) ☐ This action is **FINAL**.
- 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1773

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 1, the phrase "at least two of a layer A and a layer B" should read -- two layers A and one layer B -- for clarity.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

4. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yamada et al (U.S. Paten 4,842,951).

Yamada et al disclose a thermoforming laminate comprising two layers (25) made of polypropylene and two adhesive layers (24) made of a maleic anhydride modified polypropylene

Art Unit: 1773

(Example 1). The thickness of laminate is 0.8 mm (Example1). The thickness of layers (25) is 50-200 microns (col. 4, lines 44-45) and the thickness of adhesive layers (24) is 5-60 microns (col. 4, line 63). Thus when calculated would fall within claimed range. Since Yamada et al's polyphenylene is a homopolymer similar to the polypropylene homopolymer disclosed in the instant invention, claimed modulus for layers A deemed to be inherent. Adhesive layer forming material such as ethylene-vinyl acetate copolymer, polyolefin resins modified with unsaturated carboxylic acid (col. 4, lines 3-20). Thus adhesive layer encompasses claimed resin forming layer B. Therefore modified polyolefin deemed to have claimed modulus of layer B. In an event it is not there, a person of ordinary skill in the art at the time of this invention made would have found it obvious to optimize physical properties of each layers and of laminate for desired application.

7. Receipt of Information Disclosure Statement filed February 16, 2000 is acknowledged and has been made of record.
